Profile Summary

I am Mohammad Mirzaie, a Software Developer with three years of professional experience in building modern, high-performance applications. I am currently pursuing a degree in Biomedical Engineering, and I am deeply passionate about integrating software development with medical technology to create innovative, human-centered solutions. Throughout my career, I have gained extensive experience in designing, developing, and optimizing applications using a wide range of modern technologies. My technical expertise includes JavaScript, TypeScript, React, Next.js, Redux, Zustand, Tailwind CSS, Motion, React Native, Electron, Node.js, Express, NestJS, Docker, and advanced Git/GitHub workflows. I am also proficient in working with relational and non-relational databases such as MySQL, PostgreSQL, and MongoDB, and I have hands-on experience with Redis, API development, authentication systems, and large-scale application architecture.

With a strong focus on clean code, scalability, performance optimization, and user-centered design, I strive to create software that is both technically robust and intuitively designed. My goal is to bridge the gap between software engineering and biomedical innovation, contributing to impactful, next-generation technologies.
